ABOUT ME

I'm a self-taught Full-stack Developer and Software Engineer with over three years of experience building dynamic, scalable and secure web applications across the frontend and backend. I love working with JavaScript, it's frameworks like Node.js, React.js and Express.js, MongoDB, SQL to create robust RESTful APIs, intuitive user interfaces, and seamless database integration, building slick and efficient solutions. I love optimizing cloud infrastructure, writing clean, secure code and solving real world problems with scalable solutions. With a Computer Science degree and hands-on project experience, I thrive in fast-paced, product-driven environments and enjoy turning ideas into reliable, production-ready systems.

EDUCATION

BSc Computer Science (Hons)

Olabisi Onabanjo University, Ago Iwoye, Ogun State, Nigeria

2021 – 2024 | Second Class Honors (2:1)

PROFESSIONAL EXPERIENCE

Full-stack Developer (Freelance)

Remote | 2023 – Present

- Built responsive and interactive frontend pages using React and Tailwind.
- Designed backend systems and APIs for multiple small to medium scale projects.
- Built user authentication, CRUD operations, payment logic and analytics tracking.
- Consulted on server setup, domain management and cloud deployment.

IT Support and Systems Manager

Neuspeed Tyre Services Ltd, Lagos

Sept 2023 – March 2024

- Provided software and network troubleshooting for internal IT systems.
- Maintained software tools critical to sales, inventory and communication systems.
- Maintained systems and supported remote issue resolution.
- Installed, configured and troubleshooted operating systems (Windows, macOS, Linux) and software applications.

TECHNICAL SKILLS

Languages & Frameworks:

Python, JavaScript, Node.js, Express.js, HTML, CSS, React.js, Bootstrap

Databases:

MongoDB, MySQL

Systems, Tools & DevOps:

Linux (Ubuntu), Shell Scripting, Docker, CI/CD (basic), Git, GitHub, Postman, Docker, VS Code, Netlify, cPanel, Postman

Others:

REST API Development, Authentication (JWT, OAuth), Payment Gateway Integration

PROJECTS

ERP System (In Progress)

A full-stack ERP platform built with the MERN stack (MongoDB, Express, React, Node.js) to manage small and medium business operations including inventory, finance, customer management and reporting.

- Built React UI for inventory, reporting, and customer dashboards using Tailwind CSS.
- Develop modular backend services and APIs for authentication, inventory, invoicing and user management.
- Implement secure login and protected frontend routes with JWT and role-based access control.
- Deploy using PM2 and Nginx on a Linux VPS for efficient request handling and security

Laravel-based eCommerce Website

An online store developed using PHP (Laravel), featuring product browsing, cart, checkout and admin dashboard.

- Developed frontend UI for product listing, search, cart, and checkout.
- Enhanced user experience with responsive design and clean UX flow.
- Integrated secure user authentication and Laravel Breeze for quick scaffolding.
- Built order management, cart logic and payment gateway.
- Implemented admin panel with role-based access for product uploads, analytics and user monitoring.

SOFT SKILLS

- Excellent problem-solving and critical thinking abilities.
- Clear and concise communication skills with other developers and engineers.
- Adaptability and continuous learning to stay updated with evolving technologies.
- Time management and multitasking in fast-paced environment.
